OPERATIONS AND MAINTENANCE OF LIFTING STATIONS & CHAMBERS

SECURAA is one of the expert in :

- Lifting stations
- Valve chambers
- Pumping stations
- Sewage treatment plants

SECURAA recognizes that all sewage treatment systems and pumping stations require a low-cost, reliable service and maintenance package to compliment the investment made in their system in compliance with international standards. This will ensure the system operates efficiently and conforms to the requirements of the Qatar's local standards, Environment Agency, and Ras Laffan industrial city regulations.

SECURAA provides preventative routine servicing, emergency response breakdown and operations and maintenance for sewage treatment plants, lifting stations, valve chambers, storm water pumping stations, effluent pumping stations, etc. regardless of make, design, age or condition. Our operations & preventative maintenance services are designed to keep your lift station running smoothly and efficiently. We understand that each system has unique requirements, which is why we customize our maintenance plans to suit your specific needs. Our team will work closely with you to develop a schedule that ensures your lift station receives the attention it deserves.

SECURAA can also arrange for tankering and jetting of your pumping stations when required to avoid buildup of sludge, grease, etc. The frequency of cleaning will vary depending on the type of application and how active your pumping station is.
The scheduling of any visits by SECURA will be arranged at your convenience and completed with a list of below point check on every service visit and we take pride in offering comprehensive services that are tailored to meet your specific needs.;

General service shall include:

- Visually inspect pumps for correct operation / damage
- Assess motor / pump bearing condition
- Check motor windings for continuity and insulation integrity
- Check motor cables for wear and water ingress
- Check level control floats / ultrasonic head

- Check condition of pump lifting system
- Check operation of isolation and reflux valves
- Check condition of wet well pipework
- Check condition of wet well and valve chamber (where appropriate)
- Check condition / service ability of pump control panel
- Check and adjust all pump controls where necessary
- Check and test all safety / alarm facilities
- Check earth loop resistance
- Check condition of control panel kiosk (where appropriate)
- Clean and remove potential items to cause pump blockages from pump chamber
- Check correct operation of pumping station – level control floats, control panel fuses, indicator bulbs.
- Check Air Conditioners for the control panel

Record all collected data and report on any areas requiring attention

When you choose SECURAA for Operations & maintenance, you can rest assured that you are in capable hands. We have a fully qualified and dedicated team of engineers, supervisors, technicians and operators and our technicians are highly trained and experienced in handling all types of lift station repairs. They have the knowledge and expertise to identify and address any issues that may arise, ensuring that your lift station operates at its best as we understand that a malfunctioning lift station can cause significant disruptions and inconvenience.

That's why we offer prompt and reliable repair services to minimize any downtime. Our team is available 24/7 to respond to emergencies and provide quick solutions to get your lift station back up and running in no time.

At SECURAA, we prioritize customer satisfaction above all else. We strive to exceed your expectations with our exceptional service and attention to detail. Our goal is to build long-lasting relationships with our clients, based on trust and reliability.

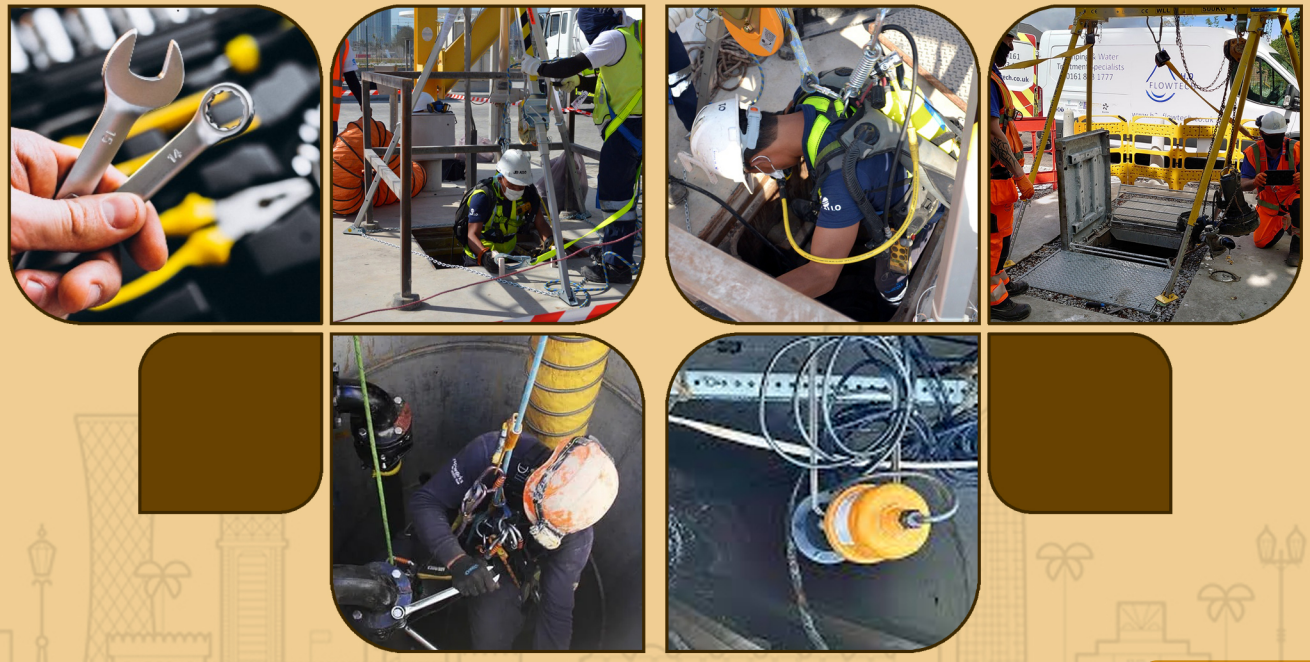

SECURAA currently involved with direct contractor for the operations and maintenance of Qatar Energy LNG's 4 no's of lifting station EPC1 -S, EPC1 -N, EPC2, EPC4 and14 valve chambers connecting these lifting stations in the Ras Laffan Industrial city, Qatar.
